Planting prices quoted on inspection of the site that is to be planted.

CONTRACTING AND CONSULTANCY in Taranaki

Our team of tree people can advise on and plan your plantings to meet local conditions.

We have many years of experience in the establishment and care of riparian strips, forestry blocks, and shelter belts on farm and house situations.

We offer a contracting service, for farm and plantation forestry, riparian and shelter-belt management, which includes pre and post planting weed control, plus planting, pruning, and thinning.

NB: Plant prices and grades as listed are subject to change without notice.

PRICING - PRICES are GST inclusive.

Over 49 plants of some single varieties = as per 100 rate.

10 – 49 = 100/rate + 20% (or +50c per PB)

1 – 9 = 100/rate + 50% (or + \$1 per PB)

There are some exceptions to this discounting.

Quotes for planting, releasing etc will be discussed on request.

Prices depend on distance, tree numbers, terrain and ground conditions.

| l low growing hedge or border | RT grown in root trainers |

S/O sold out for this season

PVR protected from duplication by Plant Variety Rights & incurs a royalty fee.

Note: OG* Open ground, bare rooted plants are available from July through to late August only. Limited numbers are available as potted trees outside the bare rooted (OG) dormant season. New season potted plants become ready from October through to April depending on variety. Plants can be ordered in advance and delivered the following year on confirmation of order.

BASIC PRINCIPLES OF SHELTER

- 1) **Porosity** Shelter should slow the wind not stop it altogether.
Very dense belts such as bamboo dump the wind on the lee side.
- 2) **Height** Preferably as tall as the site allows. Shorter to the north of buildings, sheds, tracks and farm crossings or similar sites to avoid too much shading. On farms, ultra high pruning of tall shelter trees can allow light to pass below the crown of the tree and assist in avoiding excess shading. Deciduous trees can provide excellent shelter and shade in late spring, summer and autumn but very little shading in the winter.
- 3) **Continuity** Make belts as continuous as possible (gateway wide gaps are okay) to avoid wind accelerating through the gaps and around the ends of the rows.
- 4) **Spacing**

| | | |
|--------------------------------------|--|------------------------|
| Formal trimmed hedges | 0.3 – 1m high | 4 - 6 plants per metre |
| | 1m – 2.5m | 3 plants per metre |
| Farm or horticultural shelter | 1 plant per metre | |
| Timber belts – single row | 1 plant per 2 – 3 metres = 333 – 500 per km. | |
| – double row | 2m x 2m or 2.5m x 2.5m = 800 – 1000 per km. | |

Largest plant size for the courier 1.7m.

Freight trucks can take larger grades and larger numbers of plants to some locations & depots.

Plants can be ordered in advance for delivery the following year on confirmation of order. New season potted plants become ready from October through to April depending on variety.
