

## FRUIT 'n NUTS

Our chosen varieties are selected for their history of producing well and maintaining high health.

We supply plants bought in from other specialist nurseries and we do not have details of their growing practices.

Potted plants (in PBs) have slow release pellet fertiliser in their mix.

We cannot always get the numbers we would like in due to a range of factors, for example the cyclone of 2023 had huge losses in each district, which meant plant numbers were limited. Pre-Orders also reduce the range available.

We have growers in Taranaki, Hawkes Bay, Manawatu and Nelson.

The weather can affect when stock arrives as the growers need firm ground to extract plants. So a wet June means plants come later in July. We unfortunately have no control over this, but do our best so your stock is here in a timely manner for planting.

NOTE	CODE
<p><b>OG</b> (bare rooted) plants are available in winter from July through to late August only. They can be ordered any time, with a fee for time to sort and organise order. This is \$20 per 10 or less trees, to be paid when putting order in.</p> <p><b>PB &amp; RT</b> stock available most of the year.</p> <p>Other new season plants become ready from October through to April depending on variety.</p>	<p><b>Med medium</b> sized fruit.</p> <p><b>Mid</b> fruits in middle of fruiting season for that plant.</p> <p><b>OG</b> grown in open ground, bare rooted.</p> <p><b>PB</b> grown in plastic planter bag.</p> <p><b>POL</b> pollinator for that variety.</p> <p><b>PVR</b> protected from duplication by Plant Variety Rights &amp; incurs a royalty fee.</p> <p><b>RT</b> grown in root trainers.</p> <p><b>SF</b> self-fertilising.</p>

## APPLES

(sold bare-rooted mid-June to August only)

Potted \$50

Our apple stocks are 1 and 2 year olds from 75cm to 1.7m+ tall and are available in varying numbers so order early to get the variety you prefer. All apples are sold bare-rooted unless requested otherwise. Potted price as above. Apples need another apple as a pollinator and this can be over about 30 metres, or 100 feet. Crab apples do this well. Any neighbourhood tree will do the trick. Apples fruit within 3 to 6 years or less.

### ROOTSTOCKS

**M26 - Dwarf** rootstock, virus resistant, ideal for home gardens, early bearers growing 2m tall

**MM102** (larger) - **Dwarf** rootstocks, virus resistant, ideal for home gardens, early bearers growing 2 to 3m tall

**M793** – Vigorous rootstock. Plants 30% larger than MM106. Disease resistant, resistant to collar rot and woolly aphid.

**MM106 - Semi-dwarf** rootstock produces a medium sized tree 3 to 4m (+ in Taranaki) with a short time until bearing.

Ideal for home gardens and suitable for cordons and espalier. Resistant to woolly aphid.

**Most apples are on the MM106.** Rootstocks for specific varieties are available as listed while stocks last.

VARIETY	CHARACTERISTICS	ROOTSTOCK
<b>Ballerina 'Flamenco'</b>	Columnar, spur, late, crisp texture and excellent flavour. Dessert.	793

**Royal Gala/ Granny Smith** Medium, mid fruit, fresh, dessert/Large, late fruit, fresh, dessert, cooker  
**Royal Gala/ Pacific Rose** Medium, mid fruit, fresh, dessert/Med-Large fruit, mid, fresh, dessert  
**Royal Gala/ Red Delicious** Medium, mid fruit, fresh, dessert/Large, mid fruit, fresh, dessert

**CIDER APPLES** All heirloom heritage varieties on MM106 semi-dwarf rootstocks. **Potted \$45**  
**Kingston Black** Small dark maroon bitter-sharp, slow fermenting full-bodied vintage cider.  
**Mother in Law** Mid-season, sharp flavour.  
**Slack my Girdle** Medium, mid/late, tender sweet flesh, green/ yellow skin with crimson streaks.  
**Sweet Alford** Sweet juicy small to medium fruit, high quality spreading, tall.  
**Tom Putt** Medium, early/mid, pale yellow red flush & stripes, firm yet tender, slightly bitter taste.

**Apples recommended as reliable croppers:** Cameusa de l'obregat, Captain Kidd, Coxes Orange, Irish Peach, Golden Reinette, Liberty, Merton Russet, Peasgood Nonsuch, Priscilla, Reinette du Canada, and the Cider apples.

**CRABAPPLE Malus** Excellent as pollinators for all apples on MM106 beautiful specimen trees  
**Jack Humm** Rounded tree, holds glossy red fruit well into winter **Potted \$45**

**APRICOT** These varieties have low chilling requirements. Suitable for North Island on Peach stock **Potted \$50**

**Fitzroy** From New Plymouth, Medium fruit, late, golden, heavy cropper, self-fertile.  
**Garden Annie** Medium fruit, early, bright yellow, firm and juicy freestone fruit, self-fertile.  
**Moorpark** Large fruit, mid, yellow/ orange blush, fuzz free, soft and juicy, freestone, self-fertile.  
**Royal Rosa** Medium fruit, early, firm, tasty gold flesh. Low chill, freestone, self-fertile.  
**Sundrop** Large fruit, mid, yellow skin, firm skin, freestone. Partly self-fertile, pair with Travatt.  
**Tomcot** Large peach sized fruit. Freestone, intense flavour. Compact tree, self fertile.  
**Travatt** Medium fruit, mid-late, Sweet juicy yellow fruit. Self-fertile, excellent pollinator.

**AVOCADO** We get these in stock **Mid/Late October** after the frosts are mostly done. **PB 10½long \$65**

All Avocados should be sheltered from wind and frost in their first 3 years in the ground.

Avocados are better to plant in pairs or more as the avocado flower has a period when it opens as a female, and a period when the same flower opens as a male. The 'A' type flowerer opens as a female on the first morning, closes and opens as a male the next afternoon.

The 'B' type flowerer has the opposite pattern. So it is best to get both an A flowerer and a B flowerer for fruit set.

**Our plants are purchased through Lynwood Nurseries, Maunu, Whangarei.**

**They are all at a large grade and very healthy.**

**Bacon** Bacon has medium sized fruit, is high yielding and ripe from July through to September. Remains green when ripe. B type flowerer and is quite cold tolerant.  
**Fuerte** Fuerte is the original high quality Californian Avocado. Medium sized fruit, with a medium yield, ripe October through March. Green when ripe. B type flowerer and cold tolerant.  
**Hass** The most common variety. Crocodile skin, large fruit and large yields. Ripe September to March. Skin darkens to purple/black when ripe. A type flowerer.  
**Reed** Large fruit, high yield and buttery rich flavoured flesh. Ripe December to April. Stays green when ripe. A type flowerer.

**BLACKBERRIES** Thornless and reliable croppers. Mulch heavily and water well. **PB5 \$18.00**

**BLUEBERRIES** Prefer average to acid moist soils, organic leaf matter and winter chill, **PB5 \$20.00**  
**(Specific types)** cross pollination assists good crops, can be grown as a hedgerow.  
 To ensure the best flavour leave fruit on bush for 7-10 days after turning blue.

**Northern High bush (NE USA)**

Prefer cooler southern NZ districts, earliest to ripen - mid Nov to Feb, upright, deciduous, self-pollinator although larger berries when planted with other Highbush varieties up to 6m.

**Atlantic** N.Highbush Mid-season, heavy producer, medium sized firm aromatic fruit, spreading habit.  
**Blue Jay** N.Highbush Very large berries, mid-season

Te Kahuri Stock and Pricelist October 2023

<b>Burlington</b>	N.Highbush	Late small-medium light blue fruit.
<b>Dixi</b>	N.Highbush	Vigorous spreading, late, large aromatic fruit.
<b>Weymouth</b>	N.Highbush	Deciduous, early, sweet round deep blue berries in summer, 1.5m+

**Rabbiteye (SE USA)**

Warmer districts, evergreen, upright, more vigorous, higher yields, mid Jan to mid-April, needs pollinator, 3m x 2m.

<b>Tif Blue</b>	Rabbiteye	Large fruit, vigorous, cold hardy. POL other rabbiteye varieties
-----------------	-----------	--

**Southern Highbush (Sthn USA)**

Waikato north as frosts may damage early flowers, hybridised for low chill, heat tolerance & soil adaptability, self-pollinator although larger berries when planted with other Sthn Highbush varieties, 2m.

<b>Misty</b>	Southern Highbush	May fruiting, large berries, evergreen, high yield, for northern districts
--------------	-------------------	--

**We also stock a wide range of Incredible Edibles Blueberries all year**

**BOYSENBERRIES** Vigorous, prolific cropper, ripe in December

**We stock Incredible Edible varieties throughout most of the year PB 12 \$18**

**Large plants/Large grade** **PB 12 \$26**

<b>Mapua</b>	Commercial variety due to its large fruit and lack of thorns. Plentiful crops of sweet fruit in December and January. Full sun in sheltered position. 1.5m
<b>Tasman</b>	A vigorous variety that is virtually thornless. Heavy crops of medium to large burgundy-black fruit December to February. Full sun in a sheltered position. 1.5m

**CHILEAN GUAVA (Myrtus ugni) "Tazzie Berry"**

Sometimes called the NZ cranberry. Small evergreen shrub with round fragrant red berry-like fruit, about 10mm in diameter with a sharp pleasant flavour. Eat off the bush or use in pies, jellies & sauces. YUMMY!

Attractive clipped hedge. Easy care and produces large crops. Uncut height to 1.5m	<b>PB3 \$8.50</b>
--	-------------------

**CITRUS** **PB12 \$30**

We get the larger part of citrus in **May/June** and they sell out quickly. Currently we are sold out of Grapefruit, Mandarins, Oranges and Tangelos

**We do have Lemons and Limes available from Incredible Edibles all year**

**CRANBERRIES** True Cranberry, Vaccinium Bergman. **PB3 \$9.00**

Attractive autumn tones. Good for planting in pots and as groundcover. Strong grower with ripening fruit mid-season. The fruit is a medium red colour with good flavour. Loaded with antioxidants and is a good source of vitamin A and C. Self-fertile. Harvest when fruit turns dark red in summer. Plant your cranberry in the wettest, coldest part of your garden. Prefers acidic soil and full sun. Little care required other than pruning back to encourage strong, dense growth. Frost tolerant.

<b>CURRANTS BLACK</b>	Deep acid moist soil, sun or semi shade, fruiting on new wood after pruning,	
<b>Goliath</b>	Vigorous, large berries, 1.5m.	<b>PB3 \$8.00</b>
<b>Magnus</b>	Large berries, Dec – Jan, 1.8m.	

<b>CURRANT RED</b>	<b>Gloria de Versailles</b>	Fruits on older wood, large red berries, vigorous, Dec - Jan, 2m.
	<b>Mangatoki</b>	Vigorous, prolific, small berries, December.

**We also stock a wide range of currants from Incredible Edibles all year**

<b>FEIJOA</b>	Up to 3 years to bear fruit, ornamental red pohutukawa-like flowers, sunny site.	<b>PB12 \$25</b>
	<b>We stock a wide variety of Feijoas from Incredible Edibles all year</b>	

<b>Sellowiana</b>	<b>Seedling plants</b> – Ideal for a hedge row crop, less and smaller fruit 3m.	<b>PB3 \$9.00</b>
-------------------	---	-------------------

**FIGS Ficus carica**

The Brown Turkey figs have heavy crops, brown fruit, large spreading tree, good for drying & jam, hardy, 5m.

**We stock a wide variety of Figs from Incredible Edibles all year**

**GRAPES** **PB6.5 \$18.00**

<b>Albany Surprise</b>	Bluish black juicy aromatic table grape, hardy.
<b>Niagara</b>	Green gold, v sweet, juicy, tangy, thin skin, large clusters March, low seed content, vigorous.
<b>Candice Seedless</b>	Red variety, seedless, sweet and juicy. Ready late March
<b>Buffalo</b>	Deep black variety, small compact bunches, sweet, ready March

**GRAPES – LARGE GRADE** **PB12 \$35**

<b>Buffalo</b>	Deep black variety, small compact bunches, sweet, ready March
<b>Moore's Diamond</b>	Compact in habit, greenish white and tangy. Disease and wet resistant. Ready March.

**LOGANBERRIES** **We stock these plants from Incredible Edibles for most of the year PB8 \$18**

**MOUNTAIN PAWPAW** Mountain Papaya can begin bearing within 2 years and will fruit heavily through **PB8 \$20** winter. The fruit can be eaten fresh or cooked; to eat fresh you slice the fruit in half and scoop out the pulp in the centre. The flavour is mild and tangy, somewhat reminiscent of a papaya or pineapple.3m.

**OLIVES (Olea Europaea)** Evergreen hedge & fruiting plants hardy to most soil types & wind, **PB5 \$9.00**  
**El Greco** Best used as a specimen or hedge as unlikely to fruit in NZ. 3m  
**J2** High yields of medium sized fruit. Dark purple black when ripe. 3m  
**J5** Heavy crop, good size, commercial variety, oil & pickling, frost tolerant, 3m.

**ORANGEBERRY** Excellent ground cover, very hardy, thrives in many different soil conditions and **PB8 \$18** grows happily in either sun or shade. Medium size bell-shaped fruit with orange flesh. Fruit are ripest when the calyx has reflexed to expose the berry fully. The fruit when ripe has a tangy flavour reminiscent of orange cordial. Pollination can be tricky, a having boysenberries and blackberries nearby will help with this.

**PASSIONFRUIT** We stock both black and gold most of the year. Passionfruit is a vigorous, **PB3 \$15** climbing vine that clings by curly tendrils to almost any support. It can grow very quickly under good conditions - up to six metres in one year. The evergreen leaves of the vine provide a shelter for the fragrant exotic looking white and purple flowers that appear on the new growth.

**PEACHES** **Potted \$50**  
**Fayette** Mid-season with quality fruit of a good size. Flesh and skin are yellow. Freestone.  
**Flatto 'Sweet Bonnet'** Large crops of tasty yellow fleshed fruit in early/mid-February. Flat round fruit. Clingstone.  
**Flatto 'Sweet Cap'** White flesh with excellent flavour. Wonderful crunchy flesh. Flat round fruit. Clingstone.  
**Golden Queen** Late season with firm orange flesh and skin. Fruit is slightly flat. Clingstone. Fresh, bottling.  
**Healey's Peacherine** Early peach/nectarine cross. Sweet and juicy yellow flesh. Smooth and hairless. Clingstone.  
**Hiawatha** Mid-season, purple skin, orange flesh. Excellent eating, regular cropper. Clingstone.  
**Hobbs Late Red** Late season, red skin, juicy white flesh. Resistant to leaf curl. Clingstone.  
**Paragon** Mid-season, sweet, yellow, juicy flesh. Regular and heavy cropper. Clingstone..

**PEARS** Pears are only partially self-fertile and produce better when grown with a suitable pollinator. **Potted \$50**  
 Can take up to 8 years to bear fruit. Size 1.2 – 1.8m.  
**Rootstocks:** Quince = Semi-dwarf with interstock (2 - 3m) **QuA.** = Semi-dwarf **QuC.** = Dwarf  
 Quince **BA29** = 80% the size of Quince seedling; more drought tolerant  
**Doyenne du Commice** Medium, mid, gold russet, poor keeper, juicy, good flavour. POL: W Nelis QuC  
**Louis Bon Jersey** Medium, early, long smooth green/red, juicy, buttery rich dessert. QuC  
 POL: Conference, Packham, W Nelis  
**William Bon Cretian** Large, early, green/yellow, sweet, dessert, bottler. POL: W Nelis, Conference, DDC QuC  
**Winter Cole** Small, late, green, sweet, juicy, keeps well, dessert. POL: Beurre Bosc, W Nelis, WBC QuC

**PEARS Double** **Potted \$65**  
**Conference/Doyenne du Commice** Medium, mid, dessert/Medium, mid, fresh..  
**William Bon Cretian/Winter Cole** Large, early, dessert/ Small, late, dessert.  
**William Bon Cretian/Winter Nelis** Large, early, dessert/ Medium, late, dessert.

**PLUMS**

Plums need a pollinator except for self-fertile varieties which will fruit better with company. Heavier soils suit plum rootstocks.

**CODE:** POL= pollinator. **Rootstocks:** P= Golden Queen Peach, MA= Mariana Plum, MY= Myrobalan plum. Early is late Dec. to Jan, mid is mid Jan to mid Feb, and late is mid Feb onwards.

**Plums – European** **Potted \$50**  
**Damson** Late, small, blue/black skin, yellow flesh, tart. Excellent for jams. Self-fertile. MA.MY

**Plums – Japanese** **Potted \$50**  
**Billington's Early** Early, red flesh & skin, dessert, jam. Semi self- fertile. POL: Black Doris, Luisa P.  
**Luisa** Late, yellow flesh & skin, red blush, large heart shape. Fresh eating. Self-fertile P..  
**Pernell's Cherry** Early, red skin & flesh, small, good for jams/sauces. Pollinator for Black Doris, Omega P.  
**Plumcot 'Spring Satin'** Early, large reddish black skin, yellow flesh, apricot flavour, POL: Santa Rosa MY.  
**Purple King** Mid, purple skin, yellow flesh, sweet, juicy. POL: Billingtons or Santa Rosa P.  
**Santa Rosa** Early/Mid, red skin, yellow flesh, aromatic flavour. Pollinator. Self-fertile P.

**Plums producing good crops from an early age: King Crop, Hawera, Plumcot, Billington's Early.**

**POMEGRANATE** This deciduous, compact tree produces large purple-red fruit, with a deep **PB8 \$20** red, juicy pulp. Bright scarlet blooms from late Spring through Summer. Needs a sheltered spot with lots of sun. Glossy foliage and is great in containers. Self-fertile. Harvest in late Autumn/early Winter. 3m.

**We have Wonderful or Eversweet varieties in from Incredible Edibles most of the year**

**QUINCE** **Potted \$50**  
**Pineapple** Yellow when ripe. The white flesh is aromatic with a taste that carries a hint of pineapple.  
**Smyrna(Turkish)** Smooth yellow skin. Flesh is mild, tender, light yellow and is of excellent quality.  
**Taihape** Smooth yellow skin. Lemon coloured flesh. Aromatic flesh.

**RASPBERRY Canes** **OG \$8.00**  
**Autumn Bliss** Large, dark red, Feb/March (late).  
**Skeena** Prolific, med, mid.  
**Turuturu** Vigorous, mid.  
**Williamette** Large, dark red, mid.

**We also stock a wide range of Incredible Edible Raspberries all year at \$18 per plant**

**Tamarillos** Tamarillos are best planted in late autumn or early spring in New Zealand as they **PB8 \$15** are frost tender, tolerating light frost once established. Feed well in the growing season as tamarillos are fast growing trees. Mulch and water well, particularly over the growing season.

**We stock many varieties from Incredible Edibles throughout the year.**

## NUTS

**EDIBLE HOLM OAK** **PB3 \$10**  
**Quercus ilex bullota** Edible form of the hardy evergreen oak. Acorns edible roasted & used in confectionary.

**MACADAMIA** **PB8 \$30**  
**Renown** An evergreen, nut bearing tree. Produces clusters of large nuts in hanging racemes. Nuts drop when ready for harvest. An easier variety to crack the nuts of. Takes 4-5 years to first fruit and 7-8 months for the nuts to mature. Harvest from April to May when nuts are full size. Pollination is by honey bees. Perfumed pink flowers. Self fertile but produces a better crop when cross-pollinated with another variety. Grows approximately 6m high x 4m wide in 10 years. Full sun. Best planted early spring in a fertile, well drained site. Protect from frost and wind when young.

**PINE NUT Pinus pinea** **PB5 \$18**  
(Umbrella pine) Most commonly grown pine nut, selected seedlings available from October.

**WALNUT Juglans regia** **Potted \$35**  
**Meyric** (English walnut) Large spreading tree. Seedlings bear in 8 to 12 years, sweet nuts.  
Needs free draining soil.

**NB: Plant prices and grades as listed are subject to change without notice**

**Note: OG (open ground - bare rooted) plants are available from late June through to mid-August only**  
**Plants in PBs (planter bags) available all year round**

Plants can be ordered in advance for delivery the following year on confirmation of order  
New Season's plant lists published April for Fruit and Nuts.  
There is a fee for our time and effort, \$20 per 10 (or less) plants.

Limited numbers are available as potted trees outside the dormant season.  
Largest plant size for courier 1.5m. It pays to check with your local courier for size limit as not all delivery vehicles are large enough. Freight trucks can take larger grades to some locations & depots

**Te Kahuri Nurseries** 7km west of Eltham  
at 510 Eltham Road, Mangatoki, in South Taranaki.  
**Postal Address** 510 Eltham Road RD21 Stratford 4391

**Tuesday to Friday: 9am - 4.30pm      Saturdays: 10am - 3pm**

OPEN 5 DAYS A WEEK  
Open Public Holidays 10am – 2pm  
Closed for Christmas break  
From Boxing Day 2023 – January 29<sup>th</sup> 2024  
Online sales and pickups by arrangement in this time

**We are closed on Sundays & Mondays**
